

108.02 NOTICE TO PROCEED

Work is to begin and time charges start on the date stipulated in the "Notice to Proceed". Do not begin actual work nor permit Subcontractors to begin work until all Subsection 103.07 requirements are met. The following items of work may begin prior to the Notice to Proceed date provided that all required permits are acquired, required plans have been submitted, and the requirements of Subsection 108.03.1 have been met:

- Mobilization
- Permanent traffic control
- Crushing
- BMP installation

If work cannot begin on the date in the Notice to Proceed due to reasons beyond the Contractor's control, these conditions, dates, and reasons will be recorded in the weekly "Assessment of Contract Time" form and no time will be charged. Begin work when the Engineer determines and issues a notice to resume work and that assessment of contract time will start.
